Catch & Release

On Åland it's recommended that you practise 'Catch & Release', which means that you don't take home more fish than you're planning to eat. You must put any fish you catch that is under the minimum sizes listed below back into the water. If a fish is seriously injured when you remove the hook,

you should kill the fish as soon as possible. Good Catch & Release fishing requires good equipment. It's best for the fish if you use a hook with no barb. It's also a good idea to have a pair of pliers, hook remover or tweezers and scales in your tackle box.

MINIMUM SIZES

Salmon _____ 60 cm
 Pike _____ 55 cm
 Sea trout _____ 50 cm
 Bream _____ 42 cm
 Pike-perch (walleye) _____ 37 cm
 Whitefish _____ 35 cm

FISHING on Åland

Open all year round! Åland is known for its perch and pike. But we've also got sea trout, salmon, whitefish, pike-perch and herring. Some are keener to bite in the early spring, others in the autumn. Depending on what you want to catch, fly fishing might be best for some fish, while spinning will be a better bet for others.

No-one can say it's boring! Start the day fishing for trout on the coast with the wide open sea in front of you and finish off fishing for pike in a sheltered bay. The fishing season never ends. If the winter is so cold that the bays and inlets are covered in ice, we just drill a hole and go ice fishing.

Why not stay in a cottage with a view of fishing waters from the veranda. Because distances in Åland are short, there's no problem moving from one fishing spot to another in a single day.

We've put together ready-made packages with everything you need – travel, accommodation, a boat and a fishing permit. Pack your fishing kit and come on over!
